October 22, 2026

Dear Valued Customer,

Notice of Product Price Revision

Thank you for your continued support and trust in our products.

Due to the significant increase in the price of tungsten, our primary raw material, as well as rising costs of other materials, we have implemented various measures to minimize the impact, including cost reduction initiatives and improvements in production efficiency. Despite these efforts, the continued increase in raw material costs has made it difficult for us to maintain our current pricing.

To ensure the continued supply of high-quality products and maintain a stable and reliable service to our customers, we will revise the prices of our products as detailed below.

We remain committed to further improving productivity, reducing costs, and enhancing the quality of our products and services. We sincerely ask for your kind understanding regarding these circumstances and greatly appreciate your continued support.

■ Revision Rates by Products

Products	Size (Maximum Diameter)	Revision Rates
Carbide Products in Catalog	Up to and including φ4mm	10% or more
	Over φ4mm and up to and including φ6mm	15% or more
	Over φ6mm	30% or more
CBN/PCD Products in Catalog	All sizes	10% or more

- Prices for certain products may remain unchanged or may be adjusted outside the ranges indicated above.
- "Maximum Diameter" refers to the largest diameter specified for the product, including the cutting diameter, shank diameter, or any other applicable dimensional specification.

■ Effective date

Catalog Products December 1st, 2026, on order basis.

※To ensure a stable supply of our products and maintain consistent quality, we may need to adjust order quantities for orders that significantly exceed normal purchasing levels. We appreciate your understanding and cooperation.
